

See where
the power leads you

Electric motors for industrial applications, ready
for delivery and customised to your needs.

SEE WHERE THE POWER LEADS YOU

We have a tendency to reach out to your needs with renewed energy. We are inclined to step forward **toward your needs**.

We work passionately to **improve the experience of customers who shop with us**. We want to **energise businesses** through technology, leading you to the result in very little time and with the right solution for you.

With our electric motors, we offer you the power to see the boundaries of efficiency, but more importantly, to reach them.

See where
EFFICIENCY leads you

Leader in efficiency and speed.

See where
TECHNOLOGY leads you

Break new ground with technology.

See where
SAFETY leads you

To ensure high reliability and compliance.

See where
RELIABILITY leads you

Your trust is our priority.

PILLARS

MOTORS SERIES

Our motors become solutions, which we can shape around the project, calibrating it for each individual application need.

JM - GM Series

Three-phase asynchronous motors in aluminum and cast iron from size 56 to 450

JMD Series - GMD

Three-phase double polarity asynchronous motors in aluminum and cast iron from size 56 to 160

YKK - YXKK Series

Medium and high voltage motors from size 355 to 1000. Voltage 6kW and 10kW

JMK - GMK Series

Self-braking three-phase asynchronous motors in aluminum and cast iron from size 63 to 280

ATEX Series

Three-phase asynchronous motors. TUV ATEX 2014/34/ EU group II category 3D certificates for area 22, category 3G for area 2

JMML Series

Single-phase IE2 asynchronous aluminum motors from size 63 to 100 with double capacitor

EOS - ZEPHYRUS Series

iMotor brand synchronous permanent magnet motors from size 56 to 315

E-Series and HPE

Space-saving compact asynchronous three-phase and single-phase motors

XTM and GD350RL

Xtrem Technology and Drive, IE5 Reluctance Motors and Dedicated Drives

SPECIAL PROCESSES AND CUSTOMISATION

Mechanics

- Side terminal box
- Terminal box opposite side control
- Cable entry rotated 90-180°
- Different types of cable glands
- Design shafts
- Double shafts
- Special balancing
- tolerance in precise class
- IP on request (IP65, 56, 66...)

Electrics

- Non-standard voltages and frequencies
- Weather sealing
- Additional impregnation
- Temperature probes of different types (PTC, PTO, PT100, KTY84-130...)
- Anti-condensation heaters

Painting/ coating

- Painting in RAL shades on request
- C4 and C5 heavy-duty environment painting

Speed transducers

- Incremental encoders
- Absolute encoders
- Resolver

CERTIFICATIONS

SEIPEE is EN ISO 9001 certified: 2015 TUV NORD and has the following certifications and self-certifications on products:

- CE Declaration of Conformity
- TUV ATEX 2014/34/EU group II category 3D certification for area 22, category 3G for area 2
- UL CSA and cURus certificate for American and Canadian markets
- EAC certificate for the Russian market
- UKCA Certification for the United Kingdom
- GEMS certificate for Australia and New Zealand
- Rina Certificate
- Marine Certification (Dnv-GI)
- CCC Certification

Bearings

- Electrically insulated bearings
- Bearings with special greases and seals
- Axially locked bearing
- Angular contact bearing
- Cylindrical roller bearing
- Single-point automatic grease gun for bearings

Ventilation

- IC 418: unvented motor
- IC416: motor with axial forced ventilation

OUR BUSINESS PRINCIPLES

Quality, progress and speed

Our ways of doing things, both within our teams and in our relationships with stakeholders and in the territories where we do business, are guided by our company's fundamental principles: **service, collaboration and professionalism are the driving force that propels us into the future.**

LEAD TIME

To ensure **competitive lead times**, our lead time is optimized according to different **needs**:

- 2 days for stock-ready motors
- 5-20 days for motors with non-standard designs
- 50 days for unscheduled motors
- lead time di 24-48 ore per l'invio di offerte e dati tecnici relativi a prodotti standard

Once the preparation of the goods is completed, we anticipate the **transport documents** and **packing list** via e-mail in real time.

Our warehouse is not just a physical area but the engine that powers our ability to respond to customer needs in a timely and personalised manner.

From **production** to **distribution**. From **customisation** to **troubleshooting**.
SEIPEE provides an **all-around consulting** and **needs management service**.

We are the **only solution** that leads our customers to the satisfaction of
their needs with **power, efficiency, new technologies** and **dynamism**.

SEIPEE IN THE WORLD
